

HÖEGH AUTOLINERS

Instructions for labelling High and Heavy/Breakbulk cargo for Transportation

When making a label with Höegh Autoliners' Label Maker, please ensure to use cm and Kg when entering cargo specifications.

The label should be placed in the lower left corner of the windscreen, easily readable and in reach of handheld scanners. If the cargo does not have a windscreen, the label should be attached where it is easily readable from the left side and in reach of handheld scanners.

The label must be protected from rain, so please laminate it or place it in a plastic cover.
